Sammy Liu

Data journalist

I'm a Taiwanese data journalist and a Howard Center Fellow at the University of Maryland, where I am also pursuing my graduate studies. With a background in economics and design, I combine coding, reporting, and visual storytelling to uncover hidden stories.

Skills

- Data Analysis | Python, R
- Data Visualization | D3.js, Adobe Illustrator, Flourish
- Reporting | data storytelling, multilingual interviewing (English/Mandarin)

Work Experience

Public Television Service Editor | 2024.10-2025.05

- Covered breaking news on politics and economy, including legislative sessions and national budget debates.
- Produced in-depth interviews, such as a Taiwanese soldier in Ukraine and viral figures from local communities.
- Curated special features with visuals elements, including global election coverage and undersea cable disruptions.

Business Weekly Data Journalist | 2023.03-2024.04

- Produced data-driven stories with compelling visualizations covering topics of economics, politics, and technology as the publication's first data journalist.
- Investigated industrial pollution using sewage fines and land reclassification data to identify pollution sources, earning Honorable Mention at the 2024 SOPA Awards.
- Developed the magazine's first election webpage, driving audience engagement through SEO strategy, topic curation, and candidate Q&A polls.

THE REPORTER Part-time Journalist | 2022.10-11

- Examined 20 years of Taiwan's local election data to produce two in-depth articles, providing critical insights into voting trends and outcomes.
- Help created a comprehensive policy comparison tool for mayoral candidates in 6 major municipalities, synthesizing expert evaluations to inform readers.

Educational Experience

University of Maryland, Master's of Journalism | 2025.09-now

Joined as a Howard Center fellow with Fulbright scholarship support, focusing on investigative data reporting.

National Taiwan University, Bachelor of Economics | 2018.09-2023.01

Applied statistical tools to economic questions, uncovering behavior and policy patterns through data analysis.

Course: Visual Journalism (The Graduate Institute of Journalism) - Produced a data-driven story about China's "A4 Revolution," analyzing thousands of public opinions on Twitter and creating visualizations.

Umeå University, Sweden, Exchange Student | 2022.01-06

Course: Qualitative Research Methods (Department of Sociology) - Analyzed Chinese content farms' public opinion manipulation using critical discourse analysis, focusing on rising banana prices in Taiwan.

Awards

- Honorable Mentions, 2024 SOPA Awards "Excellence in Reporting on the Environment Global"
- 2024 Sustainable and Constructive News Award.
- Gold Medal, 2022 NTU Presentation Competition
